#### 1. RTT matters

The documents below were circulated to RTC members following the March 24 NBTC meeting

RTC chair summary T2024 Deliverables March 24.pdf .pdf

Along with this RC has met with members of the pathology network and NECS <u>Home -</u> <u>NECS (necsu.nhs.uk)</u>

#### Pathology network

Transfusion and I.T. solutions are an active topic for the board. Their main focus to date has been cancer services associated with pathology, but most of the transfusion governance and process is still heavily paper based. We are working towards a meeting with the network to work on accessing funding and focus on transfusion I.T. solutions. Integrated Care Systems (ICS) I.T. Systems currently run independently as North East & Cumbria and Yorkshire, although they do have links to each other.

#### NECS

ICS NE&Y have an I.T. subdivision for data analysis which includes the RAIDR platform which was originally developed for Freeman Hospital to manage orthopaedic pre-op
